

MARIN BASIC

Experienced developer working with golang since 2012.
Open source contributor.
Interested in all things go, blockchains, micro-services
and event driven code.

github.com/MarinX

EXPERIENCE

CTO

HarttMedia

📅 2018 - Ongoing 📍 USA

Managed team of 5 people. Successfully scale company revenue by 63% in 3 months time. Responsible for gathering client requirements and preparing technical details with a distributed team. Using golang, php, javascript and liquid to build services around Shopify API. Contributor on go-Shopify client library by Bold.

Senior Go Developer

MESG

📅 2018 - 2018 📍 Thailand

Open source project. Responsible for developing core functions in MESG core platform. I was also involved in building small micro-services using golang to demonstrate usage for MESG platform to attract developers. The deployment was done via Docker. All contributions, PR's can be seen on my GitHub profile.

Lead Go Developer

BuildWP

📅 2018 - 2018 📍 USA

A contract-based role where I was responsible for creating Go SOAP client for authentication and fetching purchased products for users in the medical field. The frontend was built using Hugo and AngularJS. Daily standups via Slack, git workflow via bitbucket and deployment via Docker.

Full Stack Developer

Werlabs

📅 2017 - 2018 📍 Sweden

A medical industry where I worked in a remote team of 5 people. Building REST API's on Java Spring framework, user dashboard with AngularJS. Usage of AWS, event-driven application with Kafka. It is used by many users across Sweden, Denmark, and the Netherlands.

SIDE PROJECTS

Peerive

Website

📅 2019 🌐 <https://peerive.com>

Decentralized local crypto exchange which does not hold, store or sell data

Movie Time Asia

LINE Bot

📅 2019 🌐 <https://movietime.asia>

Geo-location LINE bot that finds available movie showtimes near you

Relaxx Asia

Website

📅 2018 🌐 <https://relaxx.asia>

Message directory to find best massage parlour in Thailand. Inspired by Airbnb.

All Game Deals

Website

📅 2017 🌐 <https://allgamedeals.com>

Find all deals across 10 online games stores in single click. Also available as google chrome and firefox extension (plugin).

Private (bought by Google)

Big Data Service

📅 2017

Undisclosed private SaaS app that feeds google search engine with data. Handling more than 1 billion request per day.

EXPERIENCE

Senior Go Developer

Status.IM

📅 2017 - 2017 📍 Germany

Open source project. I was a part of backend distributed team working on custom geth (ethereum client) project. All contributions can be seen on my GitHub profile

Full stack developer

Revenviews

📅 2015 - 2017 📍 UK

I was a part of a distributed team of 10 people. My responsibility was to build a payment gateway using golang to process payments for adult material. Handling more than \$1million microtransactions per day, it involved a full testing suite. I was also a part of a frontend team to build custom back-office dashboard (laravel, javascript) to support uploading/handling video material.

C++ Developer

Uniqcast

📅 2014 - 2015 📍 Croatia

An on-site project where I was involved in building custom IPTV solution for African railway market. Using QT framework to build user dashboard which was lately cross-compiled to mobile/tablet devices.

Go Developer

Aduro Idea

📅 2012 - 2014 📍 Croatia

I was a part of a backend team to port legacy PHP code to golang. It involved SMS gateway which is used by millions of people daily. I was also responsible to support old legacy PHP code and adding new services on golang.
